## Originals

*Arnold, M., Gonzalez Partida, E.,* Le système hydrothermal actuel de Los Humeros (Mexique): Etat du système $SO_4^{--}$-$SH_2$ à 300 °C, orgine du soufre et phénomènes d'oxydation associés à l'ébullition du fluide ascendant 90

*Augé, T.,* Chromite deposits in the northern Oman ophiolite: Mineralogical constraints 1

*Bajwah, Z. U., Seccombe, P. K., Offler, R.,* Trace element distribution, Co: Ni ratios and genesis of the Big Cadia iron-copper deposit, New South Wales, Australia 292

*Beauvais, A., Melfi, A., Nahon, D., Trescases, J. J.,* Pétrologie du gisement latéritique manganésifère d'Azul (Brésil) 124

*Buffet, G., Amosse, J., Mouzita, D., Giraud, P.,* Geochemistry of the M'Passa Pb-Zn deposit (Niari syncline, People's Republic of the Congo). Arguments in favor of a hydrothermal origin 64

*Çağatay, M. N.,* The Pancarli nickel-copper sulfide mineralization, eastern Turkey 163

*Campbell, A. R.,* A sulfur isotopic study of the San Cristobal tungstenbase metal mine, Peru 42

*Deeny, D. E.,* Central Irish geology/metallogeny: A Lower Carboniferous rifting-related exhalative catastrophy? 116

*Geringer, G. J., Pretorius, J. J., Cilliers, F. H.,* Strata-bound copper-iron sulfide mineralization in a Proterozoic front arc setting at Boksputs, Northwest Cape, South Africa – A possible Besshi-type deposit 81

*Giuliani, G.,* La cassitetérite zonée du gisement de Sokhret Allal (Granite des Zaër; Maroc Central) Composition chimique et phases fluides associées 253

*Hellingwerf, R. H.,* Formation of sulfide deposits and its relation to sodic and potassic alteration of Proterozoic metabasites in the Saxå rift basin, Bergslagen, Sweden 53

*Hodder, A. P. W.,* Relationship of paleosubduction regime and prospectivity of an epithermal gold field, Coromandel, New Zealand 247

*Höll, R., Ivanova, G., Grinenko, V.,* Sulfur isotope studies of the Felbertal scheelite deposit, Eastern Alps 301

*Ilani, S., Flexer, A., Kronfeld, J.,* Copper mineralization in sedimentary cover associated with tectonic elements and volcanism in Israel 269

*Katz, M. B.,* Graphite deposits of Sri Lanka: a consequence of granulite facies metamorphism 18

*Klemd, R., Hallbauer, D. K.,* Hydrothermally altered peraluminous Archaean granites as a provenance model for Witwatersrand sediments 227

*Lehmann, B.,* Molybdenum distribution in Precambrian rocks of the Colorado Mineral Belt 47

*Martín, J. M., Torres-Ruiz, J., Fontboté, L.,* Facies control of strata-bound ore deposits in carbonate rocks: the F-(Pb-Zn) deposits in the Alpine Triassic of the Alpujárrides, southern Spain 216

*Maurin, J.-C., Lancelot, J. R.,* Origine des minéralisations de Pb-Zn de la Vallée de la Bénoué (Nigéria) d'aprés la composition en Pb des galènes et de l'encaissant 99

*Michel, D.,* Concentration of gold in in situ laterites from Mato Grosso 185

*Munoz, M., Shepherd, T. J.,* Fluid inclusion study of the Bournac polymetallic (Sb-As-Pb-Zn-Fe-Cu . . .) vein deposit (Montagne Noire, France) 11

*Newberry, R.,* Use of intrusive and calc-silicate compositional data to distinguish contrasting skarn types in the Darwin polymetallic skarn district, California, USA 207

*Patočka, F.,* The geochemistry of mafic metavolcanics: implications for the origin of the Devonian massive sulfide deposits at Zlaté Hory, Czechoslovakia 144

*Plimer, I. R.,* The association of tourmalinite with stratiform scheelite deposits 282

*Pollard, P. J., Pichavant, M., Charoy, B.,* Contrasting evolution of flourine- and boron-rich tin systems 315

*Rammlmair, D., Raschka, H., Steiner, L.,* Systematics of chromitite occurrences in Central Palawan, Phillippines 190

*Schmidt, F.-P.,* Alteration zones around Kupferschiefer-type base metal mineralization in West Germany 172

*Shahabpour, J., Kramers, J. D.,* Lead isotope data from the Sar-Cheshmeh prophyry copper deposit, Iran 278

*Shikazono, N., Shimizu, M.,* The Ag/Au ratio of native gold and electrum and the geochemical environment of gold vein deposits in Japan 309

*Soler, P.,* Variations des teneurs en elements mineurs (Cd, In, Ge, Ga, Ag, Bi, Se, Hg, Sn) des minerais de Pb-Zn de la province polymetallique des Andes du Perou Central 135

*Spry, P. G.,* A sulphur isotope study of the Broken Hill deposit, New South Wales, Australia 109

*Spry, P. G.,* The chemistry and origin of zincian spinel associated with the Aggeneys Cu-Pb-Zn-Ag deposits, Namaqualand, South Africa 262

*Sugaki, A., Kitakaze, A., Kojima, S.,* Bulk compositions of intimate intergrowths of chalcopyrite and sphalerite and their genetic implications 26

*Tarkian, M., Prichard, H. M.,* Irarsite-hollingworthite solid-solution series and other associated Ru-, Os-, Ir-, and Rh-bearing PGM's from the Shetland ophiolite complex 178

*Velasco, F., Pesquera, A., Arce, R., Olmedo, F.,* A contribution to the ore genesis of the magnesite deposit of Eugui, Navarra (Spain) 33

*Vogt, J. H., Kollenberg, E.,* Genetic implications of geochemical factor analysis in a sediment-hosted Cu-Pb-Ba mineralization 151

*Wilton, D. H. C., Wardle, R. J.,* Two contrasting metallogenic styles in the Early Proterozoic Upper Aillik Group, Central Mineral Belt, Labrador, Canada 198

## Discussions

*Champetier, Y., Hamdadou, M.,* Critical observations on "Ultrastructure of a microbial mat-generated phosphorite" 78

*Dahanayake, K., Krumbein, W. E.,* Reply on the discussion by Y. Champetier and M. Hamdadou on: Ultrastructure of a microbial mat-generated phosphorite 78

*Déchomets, R.,* Réponse aux commentaires de Lattanzi et al. au sujet des articles: «Sur l'origine de la pyrite et des skarns du gisement, en context évaporitiqué de Niccioleta, Toscane, Italie 241

*Lattanzi, P., Riccobono, F., Sabatini, G., Tanelli, G.,* Comments on the paper of R. Déchomets: Sur l'origine de la pyrite et des skarns du gisement, en contexte evaporitique, de Niccioleta (Toscane, Italie) 236
